DETAILED ACTION

Allowable Subject Matter

Claims 7-9,17-19 and 86-87 are allowed.

Claims 77-85 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

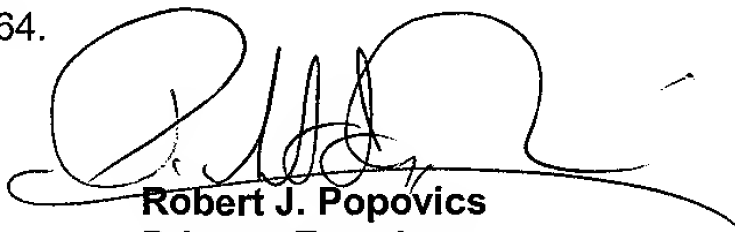

Claims 42-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over any of **Baird, Mattelmaki, Martensson** or **French Patent No. 1,165,054**.

Claims 42-44 differ from these references by specifying the use of a second rotating drum filter. The use of a plurality of separation stages, to effect a greater degree of separation and/or make use of recycle streams, is well known in the art. Any basic course in Chemical Engineering Unit Operations teaches this. Accordingly, it is submitted that the use of a second rotating drum filter would have been obvious.

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

This Action is Not Final.
